

Mosyle MDM Enrollment options

Mosyle supports enrollment of devices using Automated Device Enrollment, Device Enrollment, and User Enrollment. Navigate to My School > Apple Basic Setup > Enrollment to view the options available.

The top middle dropdown menu will allow you to choose between iOS/iPadOS, macOS, and tvOS to access specific enrollment information for each OS.

The options listed under Device Enrollment include Automated Device Enrollment, Apple Configurator 2 (iOS/iPadOS and tvOS) and Manual enroll via Safari (URL). Enrollment using one of these methods is recommended for devices owned by the school or district. Click each tile to view more information or configure specific enrollment settings.

User enrollment is available for user owned iOS/iPadOS and macOS devices. Click the user enrollment tile to configure specific settings.
