What's needed before you get started

Welcome to the Mosyle Education Certification! Before getting started it's recommended that you have access to the following items so you can apply the skills and knowledge while learning to ensure full understanding.

- Trial instance of Mosyle Education. If you do not have a trial account just yet, you can request one here: https://myschool.mosyle.com/signup/
- Mac running the latest macOS version available (recommended)
- iPhone or iPad running the latest iOS/iPadOS version available (recommended)

Throughout the Mosyle Education Certification we'll be walking through a number of settings that can be managed using Mosyle MDM and how they are configured. It is recommended to have access to your Mosyle Education account, and test devices available to apply various configurations to the devices, which may include erasing the device. Please be sure the devices used while completing the certification are test devices that won't be impacted if they are erased.
